

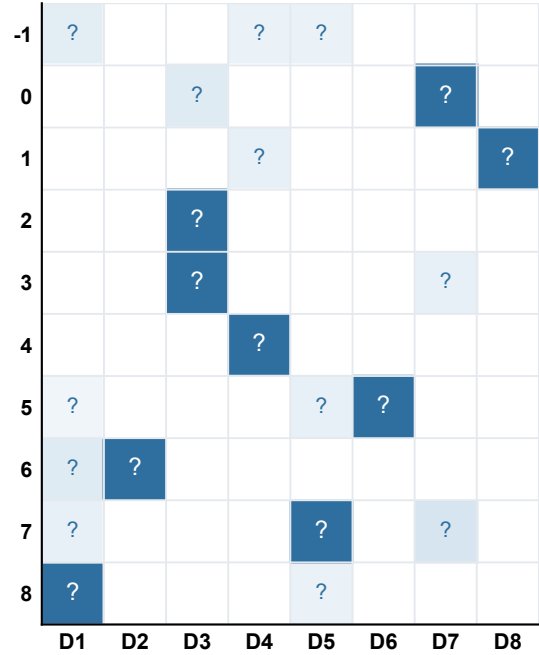

Figure 5. Cross-check between literature-derived dimensions and website-derived clusters

Independent website clusters map onto the RMCT dimensions; filled markers indicate primary alignment and open markers indicate overlap.

**Website-derived
cluster signals**

- precision engineering,
subtractive, mixed
- lead times, delivery,
on-time delivery
- energy, environmental,
renewable, efficiency
- ISO, certification,
compliance
- testing, inspection,
right-first-time
- automotive, vehicle,
parts
- data, automation,
technical data
- stainless steel,
sheet metal
- design, supply chain,
engineering support
- CNC, machining,
subtractive

D1 Process; D2 Material; D3 Certification/quality; D4 Sector/market; D5 Design/engineering; D6 Digital/smart; D7 Commercial/supply; D8 Sustainability/lifecycle
? primary alignment ? partial overlap
